LinkedIn: linkedin.com/anthony-r-jimenez | **GitHub:** github.com/Dominiscus1

Portfolio: dominiscus1.github.io/React-Portfolio/

Technical Skills

Front-end: HTML5, CSS, JQuery, Javascript, Bootstrap

Back-end: MySQL, MongoDB, Mongoose, Express, ReactJS, NodeJS

Projects

Mental Health Tracker | <https://github.com/natpitt2393/Mental-Health-Tracker> |

<https://mental-health-tracker-arj.herokuapp.com>

Front-end

- Helps the user keep track of their mental health over the course of time.
- The project allows users to register securely and input data to dynamically alter the pages. My responsibilities included handling data and using the data to dynamically alter the page based on input.
- Tools/Languages: HTML5, CSS, JS, MySQL, Express

PokeBeats | <https://github.com/negronmarc/PokeBeats> |

<https://negronmarc.github.io/PokeBeats/index.html>

Back-end

- Allows users to look up their favorite legendary pokemon battle music.
- The project successfully integrates two independent API's to pull in necessary data based on user selection. My responsibilities included setting up the calls to the APIs and the logic around the calls.
- Tools/Languages: HTML5, CSS, jQuery, pokemon-API, Youtube-API

E-ripped | <https://github.com/Dominiscus1/Workout> | <https://e-ripped.herokuapp.com/>

Back-end

- Allows the user to look up workouts based on muscle groups with instructional videos.
- Successfully integrates React and MongoDB backend for a more dynamic and cleaner user experience. My responsibilities included setting up the Database to securely store user information, setting up schemas, models, and typedefs.
- Tools/Languages: React, mongoDB, Mongoose, JS
